FULL TIME POSITION OPENING

SENIOR ARCHITECT

**evolve environment::architecture** (evolveEA) is an award-winning studio that is committed to advancing resiliency, community, and vitality by design. We believe placemaking needs to be a shared act and that creative solutions integrate the resource flows and cultural systems of a community. We are problem seekers and we collaborate with clients, communities, and collaborators to find innovative approaches and solutions.

As design thinkers and design do-ers, we are committed to being active in practice, teaching, and advocacy. We pride ourselves on a supportive and inviting office culture where all of our team members contribute in meaningful ways and our firm is a BCorp, is Just Certified, and is carbon-neutral. We are committed to justice, equity, diversity, and inclusion in our work and in how we work and we are on a journey to understand how our commitment can improve our practice and the lives of those around us.

We are seeking an architectural designer to join our multidisciplinary team to manage or contribute to architectural design projects, and to collaborate on urban design and community planning projects. We are looking for a motivated problem solver with strong visualization skills who understands the relationship between building, district, and infrastructure systems. This position is an opportunity to participate in architecture and urban design projects that shape inspiring places that are socially equitable, resilient, and environmentally sustainable.

We are seeking a minimum 5-8 years of professional experience with the implementation of commercial architectural projects and experience or motivation to learn on urban design projects. Professional registration is not required but is favorably considered. Architectural projects range in scale from small to medium size and include public, nonprofit, and private clients. This position will be expected to manage projects and workflow and to contribute to a collaborative design process. The designer/architect should be able to design comfortably at the building scale, as well as at the neighborhood or site development scale. The designer/architect should be knowledgeable about sustainability and resilience issues, understand building systems, and be comfortable navigating design and construction processes that may present a degree of uncertainty.

**Design**

- **Collaborate** with future thinkers to define innovative environments that celebrate place, environment, and equity, revitalized
- **Design** at multiple scales and in different contexts including small to midsize commercial, housing, residential (limited), transit infrastructure, and landscape/green infrastructure
- **Work collaboratively** with and lead multi-disciplinary teams consisting of architects, landscape architects, engineers, artists, and other specialists
- **Creation of communication materials** including reports, posters and other print material, and slides or other electronic presentation media

**evolve LLC** 6020 Broad Street Pittsburgh, PA 15206 T 412 362 2100 # 412 291 1582
